DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by "9's Up". The card game 9's Up discloses a method of playing a wagering game comprising providing a deck of cards, receiving a wager from players, dealing four cards to each player and four cards to the banker/dealer, each player and dealer arranging their four cards into a two card high hand and a two card low hand, comparing each player hand to the banker/dealer hand, collecting wagers associated with losing player hand(s), and providing a payout to winning player hand(s). A winning hand is a hand where both of the player's two cards hands rank higher than both the banker/dealer two hands. A losing hand is a hand where both of the player's two card hands rank lower than both the banker/dealer two hands. The table "9's Up Ranking Chart" clearly shows that pairs are highest, then non-paired hands, the sum total of the two cards having the highest least significant digit of the sum total of the numeric value of the cards.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3712

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over 9's Up as applied to claim 1 above, and further in view of Potter et al. The patent to Potter teaches that it is known in Hi – Low card games to provide a joker card that is wild, column 3, lines 42-52. In view of such teaching, it would have been obvious to incorporate a joker card to the 9's Up game. This modification would have given the players the perception that they can receive higher ranking card hands, thus making 9's up more exciting to play.

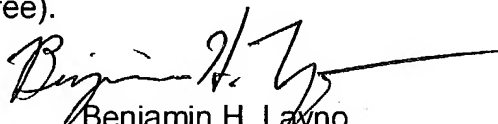

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Shen et al. discloses a Hi –Low type card game wherein each player is dealt four cards, and each player must divide their cards into a two card hi hand and a two card low hand.
